

# IS YOUR SOIL TEST TELLING YOU ABOUT ALL OF YOUR AVAILABLE NITROGEN?

## *HEALTHY SOIL HOLDS MORE N THAN YOU MIGHT THINK*

Andy & Don Cormicans' Haney soil test said there was 40# more available N than their conventional soil tests credited.

To see which test was right, they did 2 test strips skipping the mid-season fertilizer pass.

See the results for yourself on 9/19 to compare the stands, cob growth, and discuss different soil tests.
